✉ info@whitecapcanada.com

1. Identify Pain Points

- [ ] What tasks take up the most employee time?
- [ ] Which processes involve frequent errors?
- [ ] Are there repetitive tasks that employees find tedious?

2. Set Goals & Measurement

- [ ] Are you trying to reduce operational costs? Minimize human error? Boost productivity?
- [ ] How will you measure success? What KPIs will be used?

3. Ensure Stakeholder Alignment

- [ ] Have you consulted teams who interact with the process?
- [ ] Do stakeholders agree on the process's importance for automation?

4. Assess the Data

- [ ] Is the process data-driven?
- [ ] Do you have structured or unstructured data that AI can use?
- [ ] Are data sources reliable and updated frequently?

5. Evaluate Feasibility

- [ ] Is there an AI tool that fits your needs?
- [ ] What level of AI integration is required?
- [ ] Does your team have the necessary skills to implement AI?
- [ ] Is the process compatible with existing automation tools?

6. Review Process Characteristics

- [ ] Is the process repetitive and rule-based?
- [ ] Does the process have clear and predictable steps?
- [ ] Are there frequent delays or errors in this process?

7. Look at the Business Impact

- [ ] Does the process directly affect revenue, compliance, or customer satisfaction?
- [ ] Will automation free employees to focus on strategic tasks?

8. Weigh Where a Human is Needed

- [ ] Is there a point where a human is needed to step in to intervene on the decision-making process or to validate data or guide model learning?
- [ ] Who will be responsible for determining the accuracy and accountability of the AI models?
- [ ] How can human intelligence and AI be best used to produce better, more accurate results?

9. Calculate ROI

- [ ] What is the potential time and cost savings?
- [ ] Will AI-driven automation improve customer experience or operational efficiency?
- [ ] How long will it take to see measurable benefits?

10. Review and Refine

- [ ] What did you learn from the pilot project?
- [ ] What could be done differently?
- [ ] Did you achieve your objectives?
- [ ] How can you improve?

Next Steps

AI is transformative. By following these steps and using the checklist, you can effectively identify processes within your business that would benefit the most from automation, improving both efficiency and cost savings. Ready to get started? Let's chat.

About Whitecap

Whitecap is a leading custom and platform software solutions provider in Canada. We help organizations of all sizes to reimagine and transform their business through the delivery of high-quality, secure software solutions, meticulously tailored to meet their specific requirements.

Our expertise lies in creating custom software solutions and platform-based applications, designed to address individual business needs. Our software also seamlessly integrates with your existing systems, providing both customization and configuration.

We strive for excellence in our work by employing proven industry leading technologies and best practices in software development with a particular emphasis on security, UI/UX design and accessibility.

Our highly regarded, experienced local team is our greatest asset. Our detailed planning and software development process, combined with our ability to be nimble and flexible, enable us to deliver exceptional value to our customers.
